

Bikram Prasad Sah Sudi

Looking for a job where I can use my knowledge, skills, and experience to do great work, help the company grow, and have the chance to improve myself.

EXPERIENCE

Web Developer & SEO Specialist

T Data Solutions / Biratnagar / November, 2024 - April, 2025

Developed and managed the company website, optimized SEO, improved performance, and implemented digital marketing strategies for better online presence and lead generation.

TRAINING/CERTIFICATIONS

Javascript

BCA Association-MMAMC

Participated in a JavaScript workshop, learning fundamentals like functions, variables, and loops, enhancing my web development and interactive website skills.

DevOps

Broadway Infosys / 2024

Attended a DevOps workshop, gaining expertise in Docker, Linux, Drupal, and CI/CD, enhancing my skills in containerization, server management, and automation.

EDUCATION

Bachelor of Computer Application

Mahendra Morang Adarsh Multiple Campus / Biratnagar / November, 2020 - Present

BCA 8th Semester running.

PROJECTS

Cinemaghar

Developed Cinemaghar-Nepal, a movie store website using Python Django. It allows users to explore Nepali movies while admins manage movie uploads. Features include search and a recommendation system based on user ratings.

https://github.com/bikramsah/Cinemaghar-Django

Online Furniture Shop

Built an Online Furniture Store website using PHP, allowing users to browse, add to cart, and purchase furniture. Admins can manage products and update details. The site stores product and user data in a database, showcasing my skills in building e-commerce platforms.

Company Website for T Data Solutions

Developed the official website for T Data Solutions (tdatasolutions.org), providing information about Tally Prime, Busy Accounting Software, and the company's services. Focused on user-friendly navigation, SEO optimization, and responsive design.

https://tdatasolutions.org/

Namaste Nepal

Namaste Nepal (namastenepal.tech) – Developed Nepal's first interactive tourism platform to help travelers explore natural, cultural, and spiritual landmarks. Built with Python Django and SQLite, featuring personalized recommendations using KNN and Cosine Similarity, interactive map filters, travel blogs, and a ChatBox for connecting with local guides. Focused on user experience, real-time guidance, and promoting sustainable tourism.
